

like the one I have <sup>not</sup> done; — & think it  
is like a house. I will send one  
time, <sup>1st</sup> & can <sup>2nd</sup> tell you, that No. 2 is the  
best. query, how to improve  
it.

would it, or not, be better  
if it were as large as  
No. 1? — with the same  
amount of semi-tiles  
that it has at present?

would it not be better  
set up, "en medaille" —  
as the French say — as  
I have set it on the  
card or envelope?

3 - Should not the shade  
of the back-ground  
be kept lower, &  
shot off farther  
& more gradually?  
not rising, at the  
top any higher  
than the half way  
of the curve of the  
skull line, where  
I make a  star? - & then  
shot off  on tail-like  
comet behind this?

4. I think the medallion-  
sign had better be  
suppressed -

5<sup>th</sup> When you're packed, better  
let the man keep  
the negatives & glasses  
& things, & then you  
can have another  
dozen in case there  
should be any more  
wanted, without being  
at any more trouble.

6<sup>th</sup> Will you be so  
kind as to have one  
of the stages worked  
off on a larger size -  
or rather, pasted on a

large card: -

7<sup>th</sup> I will mention  
that the Stingers  
mean, I suppose, to  
pay for it. - to make  
it impossible for me  
to refuse, by sending me  
£5. that is. at all  
events I should like  
to do it - for them. I  
beg you to make what  
experiments you judge  
best, at my expense.  
I think the success has  
been good.

You may not

Wm. H. W.

to the Gal -  
for a day  
or two  
Dear Mr Sabine

The French artists  
ask how you will be  
placed? - with the head  
up, or down, or level.  
The head up, is "en équerre"  
as old curlers  
are placed on coins.  
This was what I meant,  
telling the paper

into which I  
have inscribed the  
Card the head is on,  
Stand square;  
The head is houghlt  
up; so that the col-  
umn of the neck  
is of any thing a  
little more than  
Shant up & down.

a little more than  
parallel with the  
frame or side or edge  
of the paper. The  
man has made the  
front or left hand neck  
line a little scant of  
upright. I want it  
a little more than up-  
right, — or, as I have  
made it set on the  
paper, by counting back

I present you  
the card. It is,  
I suppose effected,  
by cutting the paper  
on which the ~~card~~  
is printed, to that  
line. I don't suppose  
the plate he prints from  
is held canted. But  
haps it is.

I enclose  
one of mine the  
best; I suppose a
